Goodbye, Whiteboards

Replace traditional Room-Bed Whiteboards with large SmartTV 4k screens. Room-Bed/Patient status is displayed with color coded status indicators and alert flags. View and Update your facility occupancy in Real-time to improve your Admission/Intake process. Experience this new technology that leverages the SmartTV wireless networking technology.

Graphical Room View

Select the SmartTV Board Room-bed layout from several predesigned formats or provide your own format. A color coded Room-Bed map displays the occupants on a large wide screen 4k SmartTV. Determine at a glance, room-bed status via several available indicator flags. Color coding indicates the gender and/or the Room-Bed status. The system can be connected via an HL7 interface to update changes in the patient census in real-time.

Settable Status Tags & Icons

Room-bed-patients can be Tagged with codes and/or colorful icons to indicate their Status and Services required. For example, a room can be tagged "Quarantined" or a Bed tagged: Decertified.

Manage Admissions

Identify vacant Beds and expected discharges. Easily track Room-Bed availability and available services to provide quick answers for new admissions.

Improve Room Maintenance & Housekeeping

Set Cleanup Tags to alert maintenance and housekeeping when a room need services. Improve communications and response times by providing a heads up display of the room-bed status that is shared between the departmental SmartTVs.

Multiple SmartTVs Support

Control multiple SmartTVs simultaneously providing information sharing throughout the facility. As information changes the data is immediately pushed to update the SmartTV displays.
