## HIPAA's Five main Components

- **HIPAA Title I** makes it possible to maintain coverage when your employment changes and you're on a group plan. It makes it unlawful for group insurance plans to turn down people they don't want to cover or to build lifetime maximums into contracts.
- **HIPAA Title II** directs the U.S. Dept of Health and Human Services to establish national standards for processing electronic healthcare transactions. Healthcare organizations are required to implement secure electronic access to health data and to remain in compliance with HHS privacy regulations
- **HIPAA Title III** introduces new tax rules for healthcare treatments.
- **HIPAA Title IV** additional reforms of insurance law, with protections for those with pre-existing conditions and individuals who want to maintain their insurance.
- **HIPAA Title V** guidelines for business owned life insurance policies and how to handle income tax specifics when someone has their US citizenship revoked.
